**DETAILED ACTION**

***Response to Preliminary Amendment***

1. This is in response to the application filed on 11/24/03, in which claims 1-23 and 31-81 are presented for examination.

***Election/Restrictions***

2. This application contains claims directed to the following patentably distinct species of the claimed invention.

I. Claims 1- 8, 20, 22, 37-39 and 42, drawn to a data storage device comprising an approximate matching and pre-fetch processor connected to a storage medium, classified in class 707, subclass 10.

II. Claims 9-19, 33-36, 40, 41 and 53-81, drawn to a retrieval device for retrieving data from a mass storage medium including a matching circuit for comparing a determined key representative of the data sought to be retrieved with a data signal representative of a continuous stream of data read from said mass storage medium, classified in class 707, subclass 1.

III. Claims 21, 23, 31, 32 and 43-52, drawn to a computer having a main processor, a working memory, a supplemental memory, and a circuit coupled to said supplemental memory for pattern matching a key to continuous stream of data read from said supplemental memory, classified in class 707, subclass 6.

Applicant is required under 35 U.S.C 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon that allowance of a generic claim, applicant will be entitled to consideration of claims to additional species with are written in independent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the invention unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traverse (37 CFR 1.143).

Art Unit: 2162

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
